I am seeking a position for Laravel developers. I am seeking a company where I can show my talent and enhance my skills to meet company goals and objectives with full integrity and zest. I am searching for an opportunity that possesses adequate challenge, creativity and upward mobility while allowing me to demonstrate my skills in software engineering. I am a catalyst who can cultivate relationships and effectively present ideas.

Projects

ShopWay	Oct 2019 - Oct 2020 (1 year)
---------	------------------------------

Company: VU Software House

- ShopWay
- Shopway is an online Mall management system with some extra functionality.
 - Mall Admin create map of the mall and can configure it. He can also add/assign shops to shop admins.
 - Shop Admin show inventory weather for online selling or just for showing products on the portal.
 - Customers can buy products online from those shops which are providing online selling. Customers can visually locate shops (by searching products/shops) customizing the map facility.
 - Customers activities/visits will be logged into system and states (No of visits, total sale, most visited area of mall) will be generated from these logged activities.
 - Mall and Shop admins can see these stats and make decisions accordingly.
 - Shop admins create advertisements and discounts through notifications and these notifications will be sent to customers on their previous interests and visited locations. Shop admin can pay his rent through smart contract.

Allied School Management System

Company: Blue Lion Web Studio / Allied School

<http://alliedscc.com/>

Tools: HTML,CSS,BootStrap, JavaScript, JQuery, Laravel

It is a School Management System. In which we can add edit classes and we can see the information against each class like in which class how many student are in this class. and who's students are non-paid students of this month. and we can also see the information like how much the total fee of this class and how much fee is paid and how much fee is remaining. We also add section against each class. We can Enroll student against class. in which we also receive fee of student and can generate challan form against each month and take the print. School Management System also provide the feature to show financial information of previous months or previous year of every class. We can also add the expense and income. we can view the expense and income of every month or every date. We can also see the Daily Cash In and Cash Out we also generate the print of cash in or cashout
